Advantages Of A Trusts

WEALTH MANAGEMENT

Trusts are able to create unique asset strategies that are tailored to meet the wealth management needs of their clients. This allows them to minimize risk while providing a high level of personalized service.

MAXIMIZE BENEFITS

By definition, trusts have a fiduciary responsibility to their clients, meaning they are legally bound to act in their best interest at all times. This commitment ensures that trustees always put their clients' financial well-being first and foremost.

MINIMUM RISK

Unlike other asset protection vehicles, trusts are incredibly flexible and can be adapted to any market condition. Their ability to dynamically shift allocations ensures that settlors always have the best chance for capital reservation and gains.

PROTECT YOUR ASSETS

Avoid costly estate taxes and transferring ownership through a Trustee, which is managed by an independent third-party. This provides a smooth transition and keep your assets within the family.

FAMILY BUSINESSES

For controllers of family businesses, a Trust can help ensure equity remains within the family and is not compromised by marriage or other considerations. It allows for better protection against dilution due to outside rights from one generation to another.

MOTIVATE & DISCIPLINE

By setting up a Trust, the settlor can pass on their legacy while also motivating and disciplining future generations. Specific conditions for beneficiaries to receive income help protect against improper use of funds, ensuring that resources are allocated responsibly.

Prioritizing our customers first, we provide **innovative and flexible solutions** that are **reliable and responsive**

UBB AMANAH LABUAN LIMITED (UBBAL) trust services is committed to provide professional and high quality one-stop solution of trust service for our clients. Our business philosophy is to give priority to clients' current situation and vision for the future, focus on designing innovative, flexible and coordinated solutions, provide reliable and responsive service, and respect clients' right to choose independently.

To meet the trend of economic globalization and digitalization, UBBAL will incorporate a management model that highlights the advantages of trust: "Modern Structure, Modern Aspect, Modern Standard" to practice trust digitization and reshape the value of trust and assets. Adhering to these principles help us gain extensive recognition and support from many industries as well as become a top choice for an increasing number of institutional and private investor around the world who demand comprehensive assets management service.

Web3.0 : Everyone can create value

The birth and development of blockchain technology has led to the vigorous development and rapid growth of digital assets. In the new era and new economic environment, people need to re-examine the value of digital assets.

A person in a grey suit is holding a smartphone. In the background, there is a digital globe made of gold cubes, surrounded by several Bitcoin icons. The scene is set against a dark background with some light effects.

UBBAL has been a pioneering force in the area of Digital Trust. It provides data market and meets the policy objectives of tomorrow right at this moment, As trust companies continually strive to keep up with the shifting market environment and the wider portfolio of customer needs, they must embrace new financial technology to build wide-ranging governance and asset management structures.

Utilizing secured IT systems, trustees can develop reliable services and products to form a highly dependable digital presence that is tailored to clients' demands. UBBAL joins forces with forward-thinking tech unicorn and regulator agencies, making sure that every effort is made to reach an unified vision of digital asset governance for tomorrow's financial services industry.

What is Digital Assets Trust ?

With the rise in interest in digital assets particularly amongst younger generations, trust and estate practitioners must be well prepared to counter succession planning challenges presented by this new asset classes.

By utilizing a trust structure, the settlor is able to hold legal ownership over the digital assets* without having to personally safeguard the assets.

*Digital assets – assets which exist or are stored in digital form. Cryptocurrencies and NFTs are the most well-known examples or subsets of digital assets. The terms “digital assets” and “cryptocurrencies” are often used interchangeably.

Securing Your Future: How A Digital Asset Trust Can Make A Difference
